

BapDada's Avyakt Signals brought by Sr Vedanti - 27 May 2021

Today on the day of Satguru, I went to say good morning to BapDada in the subtle regions, requesting a message for the Brahmin family of the foreign lands.

BapDada smiled and said, "Child, being a detached observer, BapDada is seeing the effort of all the Brahmin children and is happy. At this time, BapDada wants the children to transform in four ways: thinking, speaking, doing and listening.

In thinking, BapDada wants the children to think less and do more.

In speaking, He wants the children to speak less and experiment more with silence.

In acting, He wants the children to keep an aim to be powerful in performing all actions in order to attain success.

And in listening, BapDada wants the children to listen less to the news of the world, and when listening to classes and talks, to have the intention of becoming the embodiment of what they are hearing.

BapDada said, 'tell the children to become introverted and create the stage of being an avyakt image, an alokik image, an image of attraction, a cheerful image. Then think, speak, perform actions and listen from this stage, and you will be able to give fast help in Baba's task.'

The forces of destruction are moving very fast. Now you souls who are instruments for establishment become introverted and increase the speed of subtle service. Victory is yours in the end. Have this intoxication from now and you will experience BapDada's help. Saying this and giving sweet drishti, BapDada gave me leave from the subtle regions."

This was the avyakt signal from the subtle regions for all of us.
