

Om shanti!

Yes! My attention at least a few times today was to see what could be the experience to merge in God's love. I think you must have tried today and more I realized that when there is the experience of God's love then that experience of God's love helps us to accept everything what Baba says, I think when we came in the beginning all of us, I don't know how much knowledge we understood maybe I am a soul and God's child but not the Drama, or cycle or time to return home or about the confluence age but we accepted everything right! It was not basically because of logic or reasoning so when there is love, there is acceptance. How many of you agree with me because even amongst ourselves in a relationship, when there is love, we accept and then when we accept then we start practicing, we start following.. right! Before in lokik world worthiness was the qualification in the form of education or which family you belong to but since we have knowledge that I am a soul so if I am a soul what is my worthiness, what is the soul worth? So, worthiness is recognition of my eternal self. Actually everything in life depends on purity as much soul is pure we are removing the alloy to the same extent the worth is changing first iron age to copper age and then move forward to silver then to gold so the worth, the value keep increasing and then when there is purity that's the value of the soul that is it becomes golden. Gold is when all alloy is removed and what emerges in us is our part in drama, in the golden age. Even though I think at the confluence age the part we are given, each one's part is based on the worth, both ways the self-worth but along with the self-worth, from Baba also you get to play that part because it's the worthiness. Sometimes we think, and some people even ask us how come you or anyone who is given this part - is based on what and I said it's the worthiness, the value because of the purity. So as much as we accept what Baba says and follow Baba we are reclaiming what we were originally and it's not something very simple, even if we say that yes! Baba says I have come to change you from human to deity, I have come to change you from human to deity on the path of worshipping - into Gods and Goddesses. Deities are worshiped right! But then even now at confluence age as Baba said that the love of other souls towards you will keep increasing. Love, pure feelings, bhavna, attraction of purity, worthiness, and it is very natural to bow in front of something which is pure, always! So, as the worth is increasing Baba says first you become praiseworthy, worthy of praise. I mean in today's world people will talk about someone's qualifications, but at the confluence age because based on purity the attraction, the attainments through other souls, makes the soul praiseworthy. I remember that for Didi Manmohini, Dadiji, there was so much respect. Whatever Dadiji will say in the morning, whatever she wants to give us the plan,

everyone will accept it. Acceptance was there you know because of the respect we have for Dadi. So, first we become praiseworthy, what praise? Whatever the praise we sing for Sri Krishna, first is 16 degrees pure. One time Dadi Prakashmani, she was there in Madhuban, in Pandav bhavan and she had this thought that this is God's home, so invited all the Mahatma's, guru's and all these great souls who were very famous. So, an invitation was sent and about 80 accepted. I was there at that time and you will be surprised by the requests they sent but when they came with their followers someone had a Silver throne, someone had a big chair that they brought with them and some requested us also. So, Dadi you know our Dadi Prakashmani, she was very humble. So, she was sitting in Didi's room, Didi used to be next to Baba's room so she was sitting on a sofa, it was quite a big sofa. So, one of the gurus, the most important one to him, Dadi, just like a sister said brother, 'sit here', pointing next to her. He was sharing his experience the next morning in the class, Dadi's saree they call it 'pallu' just touched him as he was sitting and he said there was such a current of purity. He was just saying the difference in our purity and in Dadi's purity is of day and night. So, the next day he came and he wanted to bow to her, he touched her feet and she said no! We don't do that here and then he said to Dadi it was during Raksha-Bandhan, generally as guru's we don't tie rakhi but today I give you my wrist, you tie rakhi and he said in his ashram there are many sadhu's, many of them. So, he starts singing the praise of Dadi and he said these Brahma Kumaris, their purity is not just like our's, as we are sadhu's, so we are pure or celibate but the purity of Dadi he said, my whole body was as though current was flowing, that is the worth right! Praiseworthy because our practice of soul consciousness and especially with Dadi's for so many years living together, there were so many of them, but they were very detached, they were very lovely, they were very sweet, and then other thing is when there is purity then there are all virtues also right! That means as much there is purity, you are peaceful, you are calm, you have patience, and all virtues like we say that God is one who is ever pure. So, then automatically all other qualities of bliss, of love, of purity all those are qualities in God. So, same is with each one of us and then further when we follow all maryadas, very high principles in life then definitely the soul is becoming worthy, worthy of praise. Baba says that at the confluence age because the body is not from pure elements, even though the body is pure, we eat pure food and everything is pure, so that way the body is pure but the elements are not from where the body is created those elements are not pure. So, Baba says because of that you cannot be worshipped. When the soul and the body both are pure like in the golden age even elements are pure then what we become is worship worthy. So, our worth when we think of our worth we have never thought this way, right! When the astrologer saw Dadi Prakashmani's hand when she was born he was telling her father that she will become empress, she will be queen, and many of us were told about our fortune by these astrologers but we didn't know what kind of fortune because

people made the world's worth equivalent to whatever wealth they have right! How many cars they have, how many bungalows they have, so these days they say this one is worth billion, five billion, so their worth is equivalent to money but it's very different, what we restore as being in loveleen stage is this deep feeling of purity and then from that purity a lot of natural love for everyone. I find that there is always love for everyone, there is only love, there is nothing else right! You don't dislike anyone, you don't have a problem with anyone, it's always love and this love is coming from purity. So, the worth, what Baba is making us, divine, worship worthy deities, and each one of us feels the vibrations from one's own self internally of divinity. I do feel I think you all must be feeling maybe not all the time and there is no ego in that, some might think oh! It's ego to think I am divine and I am becoming worship worthy, no it's not ego but Baba says at confluence when I come you have to go back or reach to your original stage of being worship worthy and not only the soul but then the elements also become pure. Our loveful vibrations, some mornings or even in the evening when I am seeing all the trees and rain and it's so beautiful. I just say to them, I love you because nature will give back to us that love. Baba says that when the worth increases then even nature will serve you. They show that Shri Krishna was being taken in a basket and crossing the river and the tides in the river were getting so high because they wanted to touch the feet of Shri Krishna, his father was almost drowning but he knew that he won't drown and nothing will happen to Krishna, so there's no fear of water because of the love, because of the purity, even the elements will not hurt you but they will serve you. So, just keep thinking about your worth and then you stay in that self-respect, self-worth brings self-respect. Some souls are amazed to see how simple our life is but how much there is this self-respect. People mostly will have so much jewelry, rings in their fingers, and so many things, but Baba's children I don't have anything, not even any bank account, nothing but I never think who will feed, what will happen, no! As souls and nature, everyone is willing to serve. So, the worthiness, think more about it which God creates or restores in us is a very beautiful aspect, which I don't think was there, yes! There was this kind of inner desire, somewhere about purity, about love for God but it's only when I understand and start practicing then naturally purity emerges. We follow maryadas but there is no fear right because the soul and body both have such beautiful, pure, and powerful vibrations because that's where love and purity, we say, has a power. So, it's very interesting to think that as much as I remain merged in God's love, my acceptance is there and I restore the worthiness. There are many hindi words but I don't know maybe very few might understand but worthiness, they belong to God's clan, God's family, Brahmin clan, we can keep thinking about this as to how much Baba at the confluence age has given us, so many titles, they are called trikaldarshi, swadarshan chakradhari, yes! So many titles! So, just remain merged in Baba's love. And it is so invisible, God's love is not something like oh! He loves me, no! But everything around

me, everything just works out so well, it's God's love, that he takes care, takes care of us in a very beautiful manner. I just feel as much He is not visible that much is His presence, arranging everything for me. I just need to have that love, and trust so whenever you are sitting here, there, anywhere, just have thought - let me merge in Baba's love. So, you are invoking that love from Baba that means you are becoming more and more full of the power of love. So, it's not just love but loveleen means to merge in God's love so when there is love then the vibrations are very beautiful. So, we have to become embodiments of that.

Om shanti!
