

Om Shanti!

When you are transparent or angelic, you can not carry any burden, there is no heaviness because you are an image of light. We know that a very subtle burden is the burden of body consciousness. Because all the actions which we did in the past were actions in body consciousness. So one of the most important and also this morning's Murli Baba was saying that practise of soul consciousness is most important. From time to time, before doing action, while doing actions just remind yourself - "soul is the one who is doing actions through the body". So as much we practise soul consciousness that much the transformation or the burden changes and really there is experience of lightness. Baba is responsible, Baba will take care of us. So if I am transparent like an angel, then one of the quality is lightness, right. An angel always is one who carries or shares the message of God. And it's message is not that God has come or God is giving us but whatever devotees are asking from God, angels will help them to fulfill their desires. I always also look at all the ancestors' souls as angels. So sometimes if there is anything then I look at Dadi Janki or Dadi Prakashmani and look at them and whatever is my pure thought, I just kind of chat with them, you gave this thought or it's my thought. So if you give then you have to fulfill it, right! Because I know, my experience is that we have to invoke angels, right. If you just have ordinary thoughts, or if you have pure thoughts, it's like you should feel yourself as an angel, surrounded by angels. I know there are some, they complain once in a while, we see images, we see shadows and heavy energy, I said because you are not invoking angels, right! Once in your thoughts you invoke angels they will come, protect you, provide you, take care of you. So now of course one is that I create my angelic stage but also create the company of angels. Of course Incorporeal Baba but then Brahma Baba, Mamma, all other Dadi's they are like angels for us. And there are many others, right! And their presence will inspire you to be more in the angelic stage. That means you will be inspired to say the words to different people who are talking to you which brings them light, fulfill their hopes and make them feel close to angelic stage. That's the true service, I know that a lot of plans are what more service can be done through the zoom classes and well, that's also important but it's very important that I bring the right words of right message at the right time to the person. So deep within that person feels that's what really I wanted, that's what I was looking for, that's what I want to do, that's what I want to become you know. And it's very subtle because how will you know, it's an angelic stage. I know that many times when a class is given or talk is given a lot of people say but that's what I was thinking, I wanted answers that's what I needed to hear. So how does it happen, I am in Baba's remembrance, I am looking at the souls and I'm speaking and whatever they need, they get it. Because Baba, your intellect is connected with Baba. So some people say "what about if I have to prepare my talk on the topic?" So I said even if you have to prepare, if you are having some outlines or some main points but stay very open and light. So you will be connected in such a way that whatever souls need from Baba, you

will feel it. So either through your drishti or words, their questions will be answered plus they will get some inspiration also, what they have to do. So, "being an angel and serving as an angel" is our slogan, right! First I have to be an angel then I can serve as angel and then today Baba said that an angel is one who has love, one who is light and one also has power. These are three important qualities of an angel and that's what makes you transparent and angelic. So think about it and when I look at everyone I say well this one is angel right! We look at everyone as an angel, our drishti towards everyone is also very important, very useful, not to look at a person as the person is but what the person is becoming. And maybe everyone, every one of us has our angelic stage but we have to just be aware of our angelic stage and start playing part that way. So from today every one of you should have thought that I am an angel, yes you all will do it? Yeah, I am an angel, show me your hands, experiment until tomorrow evening and see how much service will be done through you. Some will have thoughts of you but they will feel very happy, some will have experiences where they will be able to hear some words of wisdom. So just keep this thought and also as Baba said we have to remain full, loveful, very light and powerful also and it's possible, it's just paying attention. As soon as you find that your stock is a little empty, fill it again right! Don't leave it empty because then it will get more empty then more work, right! Okay, so keep that thought with you.

Om Shanti!
