

Om Shanti Everyone!

To belong to Baba, we need to be very obedient and honest. Whatever I have in my life, not only in a physical way, but even subtle or spiritual, everything is given to me by Baba. Baba has given us the unlimited treasure of knowledge, my inculcation, and the way of sharing knowledge. If it is appreciated, or people take benefit, then I cannot have this arrogance, "Oh I explained so well, I give so much knowledge." Remember, it's not my knowledge. I always say God has given us knowledge, I understand, I inculcate, and I share with others. Always use knowledge in a proper way.

I cannot give any label to the knowledge with my name or anyone else's name. If anyone appreciates it, I say God has given us this knowledge. The same goes for taking care of the Yagya. Whether it is administration, or running of the Yagya, whatever qualities we use, people look at that and they say, "Oh, you all managed so well." I always say that it is Baba's principles. Whatever way Baba has taught us, we are able to take care of the Yagya like Baba, especially with the quality of love. Love for Baba, and love for the Yagya. Everything I do is with a lot of love, and anything I do with love will always be successful. There is always progress, and there will always be expansion, because of God's love. If someone says that you are doing this lovingly and I accept that, yes, I am the instrument, but who has taught me? Whatever is appreciated in what we're doing, our intellect instantly goes towards Baba. Our heart goes towards Baba and in this way, others also get the good message from God that we can receive help and guidance. So, they don't connect with you for that love, but they connect with Baba.

If any soul connects with me, they might experience some love, they may appreciate it, they could get some good explanation or they could get love, but not power. Also, if they have to settle their karmic accounts, their yoga needs to be with Baba. So, a real trustee, a true trustee, will connect every soul with God. Even Brahma Baba would sometimes say, "I am just the agent." You receive from Baba, so in true trusteeship we know that whatever good elevated action is done, there will definitely be reward, there is fruition. However, I cannot say that I am the one who is giving, I receive from Baba, and I share with my brothers and sisters. If Brahma Baba says don't remember me, it's Shiv Baba who is giving everything, then not one of us really can claim anything. We say that we are trustees and of course, this includes not only this knowledge and qualities, but even my time, energy, body and wealth. I have to maintain and sustain this body, but when I am a trustee, then Baba is able to use it as an instrument. Not only that, but the inner healing and wellness that one feels in the body is because of Baba's powers. I, the soul, am getting power from God, and then doing action through the body. So, all the time, we should have the thought that I am a trustee, and that Baba is using this body. If everything is going well, even with other resources, I should think that it is because of Baba. Whatever I have is also part of Baba's Bandara. This definitely brings blessings for wealth also.

These thoughts and vibrations of trusteeship not only keeps you detached, but also you use all resources in a worthwhile way. One is to be detached, that means I don't take sorrow. Loss and profit are not mine. To get the power from Baba, think that I am

a trustee, and those resources will stay safe and definitely grow because they have to be used in Baba's service. Many of those who have lokik jobs, businesses, and a household, all have the experience of attainments. All the attainments from Baba make everything go very well. It is then important that I don't use anything according to the dictates of my mind, I have to follow Baba's shrimat, and use everything based on shrimat. There are two options: either we use our body, time and everything with attachment, or as a trustee. When there is attachment, there is sorrow and difficulties, but when I am a trustee, I am free from bondage. I have seen some of Baba's children in the household and they are so sensible, they take care of their lokiks, their business and everything. When you look at them, they are really happy, detached and content. They can get the certificate of being a trustee. Some examples come in front of me. You are responsible, but you are carefree, whether in the lokik family or in the Yagya.

Taking Dadi's blessings for everything, we all have to become such examples where there is no ego, but there is obedience. When there is ego, there is attachment, then our stage keeps fluctuating. Sometimes we are full of enthusiasm, a lot of hopes, and then we lose them. We can actually have no exact percentage of trusteeship. I am giving my life to Baba, but Baba has given me life, right? Some say that I am giving my life to Baba for service. I said that Baba has given them life, and with the life that Baba has given, you can do service. The life you had, you can't do service with that! After belonging to Baba, you have a new life, a new way of thinking, speaking, and living. That is when you become a trustee of everything, and of course, a trustee always follows directions. Some who are in the household are asked to be trustees in many projects, and you can see how they take care of everything, but they are completely carefree. When you are a good trustee, others will trust you. Dadi Prakashmani always remained happy, she remained carefree, very light, and all the time very loving. She was a good living example of a trustee.

I also read the points from Dadi Prakashmani. Baba is the one who is the Comforter of Hearts and he is the one who knows your heart. You can actually have a heart to heart conversation with Baba, because he knows your heart. You should not have such a friendship with anyone where you start sharing some useless matters or concerns. Whatever is in your heart, you only share with Baba. Also, your face should never be sad. You should not have jealousy or hatred, your face should always remain happy, and you distribute happiness. This creates an atmosphere of happiness at the center, and everyone there should experience happiness and fortune. These were some of the teachings of Dadiji.

Om Shanti
