

Om Shanti

The words from Avyakt BapDada, “holiest and highest”, sound very familiar, right? Baba had been giving us these titles, and reminding us that that is what we are. In the Golden age, the soul and body are both pure. Baba uses the word ‘paavan’, which means pure. Baba said that even now your vibrations are purifying nature and the elements, and you get a body from these elements, so the bodies will also be pure. Baba described last Sunday, how our purity is not ordinary. People respect and bow to that purity, it is higher than even many who are living the life of purity (celibacy). In my practical life, those who are around me, those I am serving, as Baba said contact souls, do they experience that level of purity? Do they feel that these souls are the holiest ones? I am sure you all must be thinking, “Am I the holiest one?” Baba gave the measurement, that means my thinking, my way of speaking, my interaction with others, will be highest. So, highest could be what? Kings and queens? Baba said no, like the deities. That is where purity has to emerge as divinity. We know that when it comes to deities or Gods and Goddesses, people go to them to fulfill their desires, forgive sins, or solve problems. So, my quality of purity, changing into divinity, that is your divine image, which we all had, and we are all becoming.

How do I measure my divinity? First, we definitely have to pay attention to our thoughts, making every thought holy and elevated. Whatever our surroundings and circumstances, everything can have an influence on the mind. But that's not what our stage should be. Baba said that we have to be in the karmateet stage. What is the karmateet stage? Karmateet means that you are not influenced by the actions of others, by surroundings, or by circumstances. You are lovely, beyond, and not influenced by whatever is happening around you. Baba said you need a very good balance of karma and yoga. Can any one of you can take certificate that every time I am doing something I am in Baba's remembrance? Who will raise their hand? I think it requires a lot of practice, and today although my day was full, many times I said, “Oh, I have to be in karmateet stage.” When we came here, the camera was not working, so I kept thinking Baba had said that when you are in karmateet stage, then you will be an image of accomplishment. Let me create the thought that it should get fixed. Baba said that time will be such that there won't be any way of communication, there won't be phone lines or internet, but that is the time when your thoughts from your karmateet stage will make things happen.

Dadi Janki once told me that she had this practice; 24 hours before calling me, she would send a lot of good vibrations, then when we talk, it would take a short time, because the feelings and understanding would be better. This is how we communicate through our thoughts and create a deep alliance and harmony. As Baba is saying, the time will come when the method of communication or accomplishment of your thought, is when you are thinking in the karmateet stage. Before we used to believe that when you are karmateet, you leave your body. Dadi Janki said, “No, I want to serve in my karmateet stage. Why will I leave as soon as I become karmateet? When will I use my karmateet stage for service?” That's what Baba meant today. I think all of us will have a karmateet stage depending on the percentage of purity or how I can stay in that stage.

Thoughts can be accomplished, and when Baba talks about sakaash, that's also called service through the mind. When this thought is there, or when we create that stage, then definitely that is the highest. Holiness gives us the sparkle of purity as a crown of light. Highness is where you have accomplished everything, that's why the deities are shown as double crowned. At present, one has to experience that. We definitely have to look at thoughts, and then our attitude which is so subtle. Something might have happened two years ago or three years ago with the person and you forget it. Then when you see that person, suddenly there is that kind of heaviness, resistance and no smile, right? What is happening? Attitude is emerging. Baba would say that you haven't burnt the seed completely. You think, "I have good wishes, I always have good wishes," but as soon as that person comes, that whole past emerges, whatever was the reason, the words or something that happened. Then, the same feelings emerge as before. One of the most important factors of karmateet is that I have settled karmic accounts with the souls from the past. However, when that situation comes suddenly and these feelings or emotions emerge, that means the seed is still there, no? Baba said that the seed has to be burned, then it cannot come back. Karmateet means that I am okay with whatever happened, but now when I see that person, I should be powerful, I have to really have good feelings. I have to have very elevated thoughts about that person, so that a new loving spiritual bond is created.

Karmateet is not only settling the past, but, as Baba said, about purity in your relationships, your contact with everyone is pure. With our purity, everyone should feel elevated, not that I am elevated and you are not elevated. Dadi Prakashmani would give drishti and love, and within a few seconds, feelings of belonging, surrender, and obedience would emerge. At this time especially, it is very important that our vibrations and attitude help souls to feel uplifted. Also, we create such a relationship with each other where I can look and say, "Oh, you are Goddess, your divinity is emerging now." Purity sometimes could be hard, in the sense that we have so many systems, rules, regulations, and now we even have to have distance. To internally feel that closeness, that love, I think that is what everyone needs at this time. Baba is saying you are the holiest, highest and with the riches, this means you are donors, right? You fulfill everyone's desires and let everyone feel full.

The collective power of purity of so many of us children only emerges when the limits and boundaries and I and mine are completely gone. Baba can use the power of purity of a million Baba's children. Sincere effort on our part is needed, otherwise, okay you live celibate and a lot of sacrifices, a lot of renunciations, a lot of separation and only for purity, then what? Where do we go from there? If I have to be holiest, the purpose is to serve from that purity. That is only possible when our thoughts, attitude, drishti, words, and use of our resources are pure. We don't waste it! So, we have to emerge our purity and make it a big big pool, and let Baba use it. Baba said that He uses our purity for world transformation. So, let us all, with today's blessing, thinking of the karmateet stage, prepare for the future, where there won't be any devices. It will be our pure thoughts that will communicate, cooperate and make things happen, because of the purity of our karmateet stage.

Om Shanti
