

Dadi Janki's message in response to all the greetings she received for the New Year and her 101st birthday – 02/01/2017

Hansaben, all those who are in relationship with Baba have sent me a birthday gift with so much love. Here also, they had such a big programme. This is Baba's wonder. We have so much attainment from Baba and apart from taking from Baba, honesty, love, happiness and power, I don't know anything else. Write down each one's name personally – especially those who have sent me love and greetings. What praise of Baba can I sing? Baba has inspired me to serve the world. I knew neither the language nor the religion, and yet Baba took me beyond all types of discrimination, beyond all types of discrimination. I read everyone's e-mails and merged their loving messages in my heart. Baba sat me in His lap, made me the garland around His neck and has sat me in His eyes. He has sat me in His eyes and taking me beyond, He has instilled such a habit in me of staying up above.

This morning, I read somewhere, that as soon as the sun rises, light spreads everywhere, just as Baba's remembrance is everywhere. So, send Baba's love and remembrance to everyone in all four directions. Achcha. Thank you. Om shanti.
