

SMART READING DEVICE

OF THE FUTURE MAY BE PAPER...

Paper books were supposed to be dead by now. For years, information theorists, marketers, and early adopters have told us their demise was imminent. Ikea even redesigned a bookshelf to hold something other than books. Yet in a world of screen ubiquity, many people still prefer to do their serious reading on paper.

Count me among them. When I need to read deeply—when I want to lose myself in a story or an intellectual journey, when focus and comprehension are paramount—I still turn to paper. Something just feels fundamentally richer about reading on it. And researchers are starting to think there's something to this feeling.

To those who see dead tree editions as successors to scrolls and clay tablets in history's remainder bin, this might seem like literary Luddism. But I e-read often: when I need to copy text for research or don't want to carry a small library with me. There's something especially delicious about late-night sci-fi by the light of a Kindle Paperwhite.

What I've read on screen seems slippery, though. When I later recall it, the text is slightly translucent in my mind's eye. It's as if my brain better absorbs what's presented on paper. Pixels just don't seem to stick. And often I've found myself wondering, why might that be? **MORE at <http://www.wired.com/2014/05/reading-on-screen-versus-paper/>**

I met, not long ago, a young man who aspired to become a novelist. Knowing that I was in the profession, he asked me to tell him how he should set to work to realize his ambition. I did my best to explain. 'The first thing,' I said, 'is to buy quite a lot of paper, a bottle of ink, and a pen. After that you merely have to write.'

— Aldous Huxley, novelist (1894–1963)

A Celebrated Life

Special remembrances of our brother, BK Anthony Strano, dear generous friend, prolific author, and deep and wise thinker.

We all loved him. As one amongst the first double foreigners, he was an image of success; he led his spiritual life beyond any label of 'double-foreigner'. He visibly enjoyed his BK life, and was also appreciated by the Dadis and the whole BK community.
