

Om Shanti everyone!

You all had some experiences of being an easy yogi. Once we are able to maintain our stage as good, stable, peaceful, and loveful, you will feel very close to Baba. If I am peaceful I am very near to the Ocean of Peace. If I am loveful, it is easy to be with the Ocean of Love. I need to be that image, so that I can connect. When I came to knowledge, whoever was my instrument would say, "Baba is Sagar (ocean), and you are Swaroop." That's how I began, I am "Shanti Swaroop", the image of peace, and Baba is the Ocean of Peace. Then there is knowledge and dharna, I have to use knowledge of Drama and use the knowledge of my part. When I use knowledge and create dharna, then it is possible to be that image. First, Baba gives knowledge, then there is yoga based on knowledge. When we listen to Murli in the morning, there are so many points that can help us to have accurate yoga with Baba. Baba said that when there is yoga, the alloy will be removed, your sins will be burned, and you will become pure. Today, Baba said that it is only when you have yoga with Almighty Baba that you become pure. There is no one in the world who can purify you.

We understood that to be detached and lovely is to be on a lotus-like throne while doing actions. When you sit, yes you can be detached, you can be very lovely, but when you are in action, there is tension. Baba's blessing was that while doing karma yoga, be seated on the lotus throne. I kept thinking about this all day. That is the benefit of having homework, we practice many times, our mind is pulled to homework, and then we pay attention. Even if you get involved in something and then you say, "Oh, but what about my homework." Then, you can create that stage. Baba also said that all stock has to be in the sanskars. Sanskars are created through actions. Thoughts only do not create sanskars. Sanskars emerge from the thoughts, but they are really created through actions. So, loveful attitude, loveful words, loveful actions, and loveful drishti, create the sanskars. We used to think that we want to go to the new world. Baba said, "No, new sanskars, new world, divine sanskars and divine world."

We have another whole month to see if we can make all the stock in the sanskars. That will definitely help. Baba also mentioned this morning about the third eye, divine eye. When the intellect has knowledge, it can start seeing things very clearly, so then we call this a divine intellect, the third eye. Baba has given us knowledge of the past, present, and future, the three aspects of time. Baba will not tell what's going to happen in Drama tomorrow, but we know that we are in the Confluence Age and we are moving towards the Golden Age. We can see how, in the Iron Age or Kalyug, there is so much sorrow and deception, so many things are happening every day. We know that Kalyug is going, and Satyug has to come. So, while doing everything, just be detached and lovely. Baba bestows on us the third eye of knowledge, the three worlds, and the three aspects of time. Of course, you see through these eyes, you see physical things. While seeing the physical, we see through the eye of knowledge, because it is a divine eye, divine vision. Baba keeps saying to look at each other as divine beings, and keep praising each other.

Everyone has a lot of specialties. The more we recognize, the more we appreciate, the more this becomes part of our sanskars, too.

So, our attention more and more should be to see with the divine eye, eye of knowledge. This is a gift from Baba, actually. Baba says, "First, as soon as I come, I give the children the gift of divine eye." Through this divine eye, my attitude has to be divine, my drishti has to be divine, everything has to be divine. So, we are entering the practice of divinity "Devi". Baba had given two Murlis on sanskars and sansaar, the world. We heard in the Murlis, 'one undivided kingdom', 'self-sovereignty', but what is it like in practical life? So, we will take from these Murlis and practice the image of Trinetri in Hindi, or in English they say, 'third eye'. So, reflect, practice, have some experiences and also put something in stock.

Om Shanti
