

Om Shanti!

December is the month for children, so the children make announcements and do everything. They make us happy. Just imagine a five-year-old who can speak like this, how good she will be when she gives talks. Anyway, lots of love to all the little angels from Baba. Everyone is the unique creation of God, every one of us has many gifts and specialties from Baba. Each one of us is sustained by Baba. I always remember in both lokik and alokik ways, that if you are healthy, well, happy, you glorify your family's name, otherwise they will say, "Are you fed well? Are you taken care of by your parents? Do you get everything?" Our face should never be such that somebody has to sympathize or feel sorry. I am the one who has to glorify the sustenance of my parents. I can remember all the years of my life, how much Baba sustains each one of us, but Baba says that some use sustenance and some don't. Our Dadi Janki always used to say, "Everyone's face should be like mine." That means always happy and full of enthusiasm. I remember Dadi Janki so much for her energy, always enthusiastic, very happy and very full because that's the sustenance she was using. So, using the sustenance from Baba is like saying that it's very very important, Baba has lots of love for us, and we have love for Baba and at Confluence Age, we are together with Baba.

He gives us company, and we are also His companions, but for how long? It should be forever, but nothing is forever. Every moment of the Confluence Age, we should really take benefit. The company of Baba is very important, plus it's not just companionship, but Baba is making us into angels. Each one of us internally, even if we are using our body for actions, our mind is pulled towards Baba, then Baba gives us such feelings that one feels angelic. It's just a question of feeling it and creating that angelic form. That's what Baba says will be our future service, because circumstances and conditions of the world are very unpredictable. We have to be ready to serve as angels. We will feel that we are quite busy serving internally, someone wants peace, someone wants love, someone wants power. Through our angelic stage, we keep giving whatever the needs of the souls are at the right time. Baba said that fulfilling those needs will be the true service, selfless service. Each one is unique, rare, out of millions. No two can be the same, each one of us is unique. Each one of us looks at our speciality, still we are willing to be part of the rosary. I am unique but still I am part of the rosary, a rosary that is very aligned and cooperative.

We have taken the theme of 'be ever happy' and our practice is to look at our percentage of contentment. Did my faith fluctuate? Even very subtly in my thoughts? Does a question come about my future? You can experience the wonders and miracles of Baba when you are 100%, whether it is in faith and knowledge or in the directions of Baba. It has to be one hundred percent. Let Baba do wonders and miracles for me, but also for others too. The new year is starting, so what do we have to do? We have to prepare ourselves for angelic service by creating our angelic form. One thing I

wanted to tell parents, children and all of you is that we have faith in Baba. Baba protects us, but we have to be sensible, whatever the present situation is, look at whatever is necessary. See if we need precautions, if we need to wear a mask. Whatever is necessary, we should do it. We cannot challenge Baba saying, "Baba, I'm doing this, you will help me." Baba will say, "But why do you have to do it?" The more we act sensibly, Baba will be proud of us.

Reflect on contentment, make 100% marks in the very important subjects like concentration, determination, faith and remembrance. What is my chart at night when I look at it? Today, I really was with Baba most of the time, and it's not just sitting in remembrance, how many hours can one sit? It is internally feeling love, doing everything with love, and in the company of Baba. That is very important.

Om Shanti
