

Om Shanti!

Baba is talking about receiving. Baba loves us, all of us. We feel that love, but we are not able to keep that in such a way that we are able to share that love with others. Soul to soul love is different from Baba's love with everyone. Everyone should feel Baba's love from me. Whatever I do, because it's Baba's love, every soul should feel Baba's love. That means that I am receiving Baba's love, so I am able to share Baba's love. Baba is also the Ocean of Peace. Every quality of Baba should be experienced through us. This indicates that I have yoga with Baba. So, maybe we feel it, but in the personality, the whole personality should be of God's love, with a lot of peace, patience, courage, because receiving is to become that. Whatever the percentage of becoming, that much, I am receiving. The sparkle in the eyes and on the face of God's love indicates that I am becoming what Baba is giving me. Always remind yourself how much I am becoming what Baba is giving me, and that is what Baba is calling obedience. Obedience brings blessings. Baba used two words today. One is 'blessings' and the other is special blessings or "vardaan". One is called "duaen", you know you get blessings but the other is that Baba gives you some special gifts. That means you are becoming; you are very obedient. Obedient not only doing what Baba wants us to do, but also becoming.

So, Baba said that we need a lot of determination, because generally whatever thought we keep in the morning, we want to have that stage the whole day, and Maya will make tests in the same form. Tapasya will help to maintain our stage. Actually, whatever test comes is only to make us strong, so that we can use our powers. Otherwise, how will you know you have that power? Internally for me, I feel that true obedience is being sweet and loving, constantly sharing. Baba said that knowledge is not in the scriptures. He is the Ocean of Knowledge, and we children become the rivers of knowledge. We receive from Baba then we give to everyone. Not only Baba's message, but also Baba's vision of the Murlis, reminding us that true obedience is to become like Baba. We will be taking one point per day from January 1st about how to be like Baba, to be a constant bestower. Also, while taking drishti from Baba, I feel that Baba is with us, but not forever. Now Baba is with us, so take as much as you can take, be in His company.

It is said that when you are happy, you dance. I found that when you are in the Avyakt stage, you are automatically dancing. You experience that your hands and your whole body is moving in a very beautiful way. Not just a physical dance, but the dance of Gopes and Gopis. Tapaswi is very still, very consistent, and very determined. Even internally, I have to repeat that I am a soul, I am peaceful, I am loveful. This is important. Never allow yourself to be empty at any time. I remember once Baba said that when we are full, there is no Maya. It is only when we are empty, it seems like it's karmic accounts or some thieves that take away our happiness, they take away our power. We shouldn't let it be like that. It is true cooperation and service in the Yagya that everyone remains full, everyone becomes the embodiment of Baba's love and peace. Karma yoga is okay, but if you are doing karma yoga forcefully, not with a lot of love and happiness, how many marks will you get? So, you have to have that love, God's love, constantly be an

embodiment, and share that. Love, sweetness, and cheerfulness are very natural qualities of a deity soul, and we are all deity souls. When we look at images of the deities, what do you feel? So, each one of us has to keep that aim.

Om Shanti
