Golden Drops Initiative will be launched on June 1, 2022 and aims to emerge feelings and visions of the beauty of humanity. We understand that each soul carries deep inside the memories of a beautiful world, from their first moments of entering the drama. Awakening these memories of beauty will generate feelings of hope. Hope opens the mind to see new possibilities and stimulates a sense of personal influence on the state of the world. The Golden Drops will fill the atmosphere with vibrations to bring a beautiful world closer, so in this way we consciously create a beautiful world.
