

Specially for Parents

To ensure our children lead a healthy & crime-free life. What keeps me stable as a father is to remind myself that everything happens for a reason & it's always part of the drama.

Brother Amos

The greatest challenge in being a father...

The greatest challenge I have playing the role of mother is being free from anger. The point of knowledge that helps me in this task is having the consciousness of being an instrument or trustee. With such an awareness I feel I am an instrument of the Divine, taking care of children of God and this helps me to have pure soul conscious feelings of love for my kids.

Sister Radhika

Parenting Tips

The most useful speciality I have developed after becoming a mother...

To ensure I can financially support my two children's higher education & provide for their spending allowance. I try to constantly maintain the awareness of being a trustee so that I'm not under any pressure.

Brother Kang

Giving selfless love without expecting anything in return. This nature has made my heart feel so full, free & fearless to meet any obstacles or challenges throughout the course of my life. I cherish & regard it as a blessing, a kind of service which has paved the way to mutual happiness, contentment & a meaningful life.
