Year of Blessings

Golden-Aged Greetings of Pure Love

At this auspicious time of change, souls of the world are reflecting on the coming of the new year and its significance in their lives.

But for the ancestor souls, the hearts and minds are focused on the dawning of a new age, a new way of living, a new world. Through the purity of our lives, Baba is creating a world of happiness, peace and prosperity— a world where there is no name or trace of sorrow.

That perfect world is built at this time using the most divine and sacred materials that exist to man: faith in self, remembrance of God, cleanliness of heart and tireless dedication to uplifting humanity. Baba has given us the most beautiful life we will ever know in the corporeal form: the confluence-aged life where our every breath is filled with purity, and our every act is a blessing.

May you celebrate the wonder of your life, a life that is blessed by the supremely pure vision and feelings of our Beloved Father.
