‘Baba said according to this time of the virus and illness, Baba is going in all directions, and in some places Baba’s children are sad and depressed...

Baba emerged a scene of a very beautiful building under construction... In the lokik world, when someone constructs a building, along with building, they also visualize how they will decorate the building...

Baba said in service, you children do a lot of commentaries. According to the time, people often waste a lot of their time remembering the virus and illness...

For both old children and new children, you have to do commentaries about the coming world, you have to remind them where they were in the beginning, what that world was like and where God sent them. Remind them and emerge the Golden Age... Divert their attention to the Golden Age, the coming age.

People in the world visualize the coming age, and for the coming age, and for the coming world too, you should help souls experience the new world.

If you do such service, people intellects will be attracted to the new world. Baba said this is the method.”
